

Dangerous Dialogues *Holy People, Holy Sex*

*A conversation about sex and
homosexuality and the church.*

The issue of homosexuality has become unavoidable for the church. In his research, David Kinnaman has found that of all issues that Americans outside the church are most likely to identify with Christianity, the most common is a negative view of the church relative to homosexuality (a 91% negative perception). This leaves the church a public perception problem that needs to be addressed. Join us for a conversation exploring scripture, sex, and sexuality, as we discern how to address Kinnaman's potentially catastrophic statistic.
